DB Controls & HVAC Services supports industry and business by ensuring critical mechanical services continue to operate due to our remote monitor diagnostic service and maintenance control platforms which enable us to provide instant support to our customers when they need it the most.

---

## Summary

DB Controls & HVAC Services was started in 2019 as a Control System Integration company and soon become a trusted and approved vendor with ongoing contracts in the oil and gas, commercial and industrial sectors where we provide ongoing support to customers such as Woodside, Monadelphous, Mitsubishi Electric, ADCO Air and many more.

The company was started after 17 years of industry experience including commissioning and technical management on over 350 commercial and industrial tender based HVAC and D.D.C projects throughout WA including key projects like Woodside's Pluto LNG site in Karratha where we continue to provide ongoing services and technical support.

---

## Description

DB Controls & HVAC Services is a West Australian owned Control and Maintenance Integration company specialising in highly secure remote access control solutions that allow BMS, Energy Management & Proprietary D.D.C control systems to be integrated with Service and Diagnostic Software and managed through a single remote access platform.

Our remote access service and diagnostic control systems are redefining how service and maintenance is approached and setting a new industry standard in a level of support

that we provide to our customers. Due to our ongoing contracts in oil and gas and high-profile clients we use the highest level of cyber security protection which has led to implementing remote access on sites where remote monitoring was previously rejected.

We specialise in BMS, PLC, D.D.C & energy management control solutions. We are Conserve It Niagara Product Partner, approved system integrator and certified Tridium Niagara System Integrator.

## Industries Served
